

# Herculan ConstaBoost™

## Rack Mounted Duplex Pump Systems

Strong – Silent - Dependable

### Shown is a SSPB150/150AD

This pressure booster is built around our patented PumpChamber™. It has two 1.5 Hp 20 GPM pumps with an alternating Lead/Lag control and will deliver consistent pressure from 1.5 to 54 GPM. Comes complete with HOA switches and pump **On** indicator lights.

Duplex Herculan ConstaBoost™ booster systems can be mounted to a wall or as free standing units fastened to the floor and ceiling.

Electrical requirements: one 120Volt 15Amp and two 240V, 20Amp dedicated circuits

System pictured is 42"W x 76"H x 29"D – other configurations available

- Complete packaged system
- Lead pump alternates at each start
- Factory adjusted and tested
- Installs in minutes
- Little space required
- Ultra Quiet
- Dependable - Built to last
- Up to 15' Suction Lift
- Consistent pressure & volume
- Many pressure ranges available
- Many flow ranges
- System does not need to be shut down to service or replace one pump

### Models for buildings with municipal water have these additional features:

- Auto shut down if water service is shut off
- Auto restart when water is turned back on

### Use with any tank storage system to get high peak demand delivery rates from low yield wells
