

Herculan ConstaBoost Static Storage System

Models 95, 160, 165, 220 with electric fill

- Red lines are wire connections that must be made in the field
- The Consistent Pressure Module is a separate piece that must be wall mounted and piped to the PumpChamber™ and the house plumbing
- The Inlet requires a filter as the solenoid valve has small equalizing ports that can clog
- Treatment equipment may be installed on the inlet or outlet of the system.
