**Whether you have a small need:** Like the home above whose owner needed water to keep his home business running when the well pump quit or you need to wash hair for a sidewalk demonstration on *Fox and Friends* early morning TV show

**OR a Large need like those below** a TWS can do the job quickly, quietly and easily.

**Shopping Center Loses Water Supply:** When the pump in the well feeding this shopping center burned up and couldn't be removed due to a protruding rock, the Acme Market, Pizza Shop, Chinese Restaurant and Subway sandwich shop needed an answer. Somerville Well got it all up and running in hours using the 150 gallon TWS with 1.5HP 20 gpm pump and a tank truck. All functioned normally for a week while a rig was brought in to drill out the well.

**Times Square, New York**

When Head & Shoulders wanted to construct an instant Salon with 3 wash and 6 styling stations on the square they needed a water supply where there was none and it had to be the correct temperature. The TWS at left handled the job easily. Between 7:30AM and 2:30PM ordinary people lined up and celebrities came and went. In the end, 200 customers were served without complaint.
