

Well Manager® for Crawl Space Applications

Overall Size 71.25"L x 37" W x 38"H
WM210CPLH-50LPC

Amazing Performance From Unbelievably Poor Wells When height is a problem

- ✓ Patented in the US & Canada
- ✓ Uses your existing well pump
- ✓ Will fit in 39" high crawl space
- ✓ Complete self contained Well Management System use on wells that produce as little as 1/10th gpm
- ✓ Easy to install slide into place, pipe inlet, outlet, make wiring connections and it turn on
- ✓ Expand storage easily by connecting additional tanks only 26.5" high
- ✓ Provide Consistent Pressure every bit as impressive as city water
- ✓ Remarkably Quiet
- ✓ Rectangular Storage Tanks of PE resin meeting FDA regulation 21 CFR 177.1520 © 3.1 & 3.2, extra heavy walled tanks made to last
- ✓ Tanks come with everything installed on them:
 - Well Manager UL Listed control panel for 1 or 2 wells built to industrial standards installed on the tank – end or side mount available
 - All penetrations water tight
 - Low water cut off protects pressure pump
 - Flow Detector protects well pump
 - Timing control protects well from overpumping
 - Everything can be unbolted from tank
 - Tank level controls pass NSF 61 Potable Water
 - StaRite 10 gpm pump with 5 yr warranty provides great pressure
 - 230V pumps draw 5.5 amps; 115 volt units draw 11.0 amps
 - All but 3" of stored water usable
 - Overfill Shutoff with manual reset stops overflows
 - 1" inlet & outlet
- ✓ All field wiring connections by wire nut in one box
- ✓ Service or replace pump without draining tank
- ✓ Installation, set up and maintenance Manual
- ✓ Many options – Radon, odor removal see back

WM210CPLH-50LPC
Overall dimensions 71.25"L x 37"W x 38"H

This packaged unit will fit in spaces lower than anything else on the market and the pump can be removed with the system in place in a 39" high crawl space.

Electrical requirements:

Systems with 115 volt pressure pump: one 230V 20 amp circuit, one 15 amp 115V circuit

Systems with 230V pressure pump: two 230V 20 Amp circuit, one 115 V 15 amp circuit.

Available Through:

When height is a problem - More Storage In Less Space

Rectangular tanks permit larger storage capacities in less space than round tanks. Several tanks can be assembled to provide generous storage even in a crawl space

When you do not have a lot of height, these horizontally configured systems are the answer. They measure 37" W x 71.25" long x 38" High with everything mounted on the tank. In a pinch, everything unbolts so you can put them through small openings 26.5" x 37" and then reassemble the system when you get it in place.

WM210CPLH-50LPC
Overall Dimensions: 71.25" x 37" x 38"
WM210CPLH-50LPC 39" High

Increase Storage by Adding Tanks

Matching storage tanks are only 26.5" to the top of the lid. Connecting manifolds are available

Spray Boom Fill

A Spray Boom Fill can reduce or remove sulfur odors, and gasses like, H₂S, Oxygen, Air, CO, CO₂, Methane, natural gas and Radon without chemicals or additional mechanical equipment. This reduces the space required for treatment equipment and uses less energy than other treatment methods.

Using a Spray Boom Fill for odor, flammable gas or Radon removal requires the addition of a power vent to the exterior of the building.

Side View of a WM210CPH 49" High

This WM210CPH has a spray boom and blower that runs when the tank is filling

WM210CPV with extra tanks 74" High

Pump Installed	Delivery Rates at Outlet of CP Models										
	@35 PSI	@40 PSI	@45 PSI	@50 PSI	@55 PSI	@60 PSI	@65 PSI	@68 PSI	@72 PSI	@75 PSI	@80 PSI
½ HP 10 GPM	13	12.5	12	11.0	9.0	8.0	4.25	1.5	Off		

Options That Add to Comfort, Utility and Ease of Maintenance

Remote Tank Level Indicator

24 volt display can be mounted in laundry, kitchen or next to the door to the garage. Comes wired with plug-in pigtail

Stop Loss Control

Water the lawn but hold enough reserve for your shower or prevent running toilets from emptying your tank. Order with a system and we install it on the tank.

2 Channel Notifier

Calls one or several people of your choice. A voice tells them where it is calling from and what the problem is! Turn off alarm from your phone and listen in to noises in mechanical spaces

Spray Boom Fill

Sprays the water from your well into the tank and reduces or eliminates dissolved gas like methane and Radon. Eliminates rotten egg odors. No chemicals needed.
